TICKET & WRISTBAND SCANNING APP

ABOUT

Our unique app allows you to **scan** and **validate** all types of **barcodes** using an Android based smartphone. Fast and reliable, our app uses innovative technology that can be setup in minutes.

GOAL

To provide **promoters** and **venues** with an independent and affordable barcode validation solution.

THE PROBLEM

I

unnecessary
crowd of
staff at gates

II

unable to
assign per
gates

III

unaudited
reports of
scans

IV

discrepancy
against
tickets sold

V

expensive
access
control tools

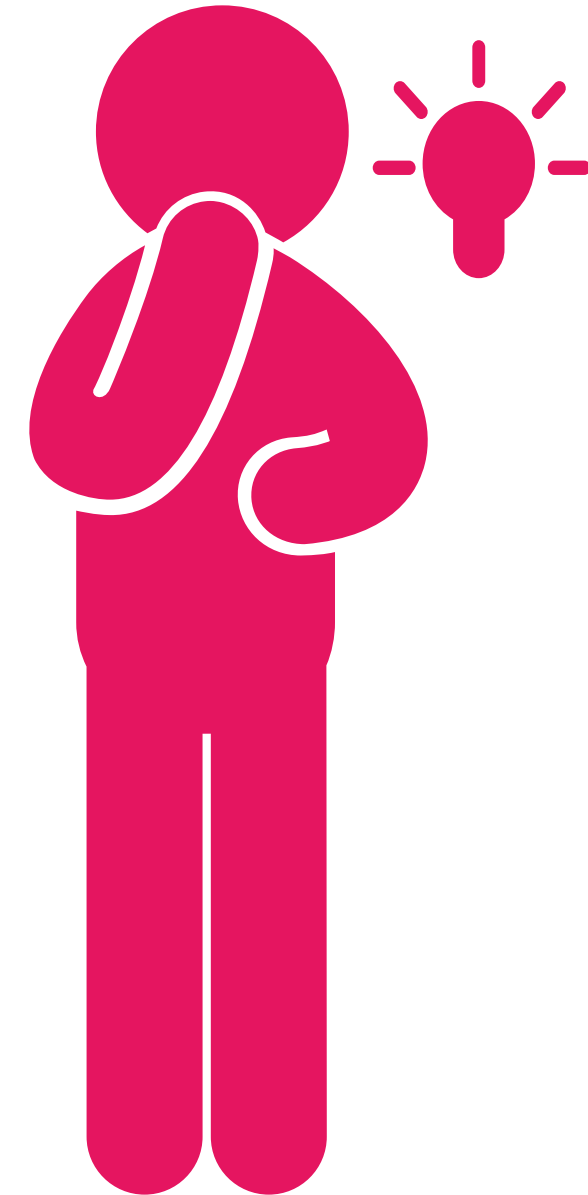

VI

unreliable
internet
connections

THE SOLUTION

Our app is the answer! We'll upload your barcodes in advance (or build your database using our **Database Builder** on-demand) and scan for validation. It literally takes **minutes** to setup.

Simple!

ADVANTAGES...

rapid
barcode
scanning

anytime,
anywhere
access

eliminate
fraud and
duplicates

create forms
to collect
data

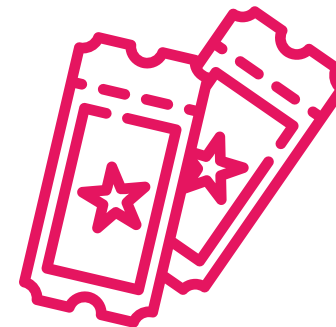

detailed
reporting
end of day

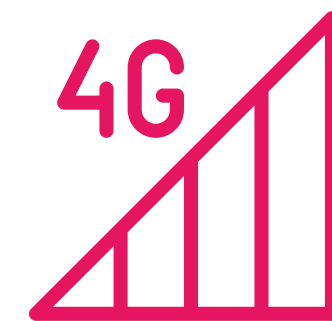

build
database on-
demand

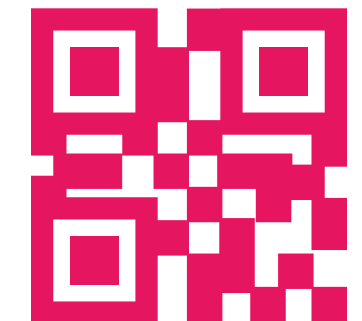

work offline
with auto
sync

integrate

sellers

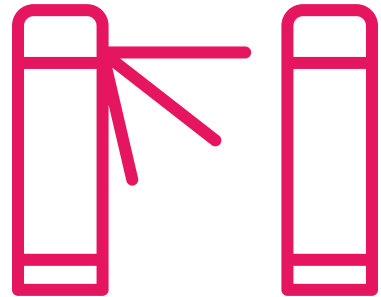

wireless
access
control

scan all
types of
barcodes

...AND MORE

control entry
and exit
points

control and
validate staff
credentials

GPS and
photo
capture

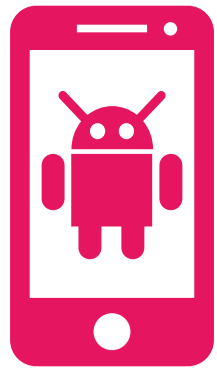

specify
permissions
for users

manual
barcode
lookup

ADD-ON SERVICES

It doesn't end here - we've got a range of add-on services designed for you. Rent our devices, hire our experienced staff or simply let us manage your event.

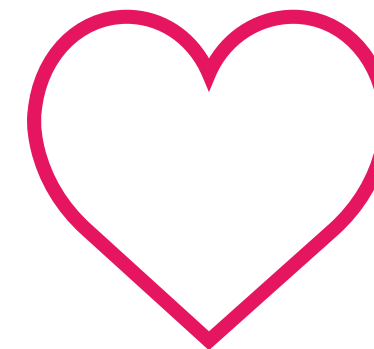

use our
smartphones

medium and
long term
contracts

OUR DEVICE

We'd be happy to lend you our Android based smartphones! **Durable** and **water proof** with long-lasting battery life, all of our devices are equipped with **4G** internet connections.

This means that all of our smartphones run as a standalone device while accessing the same database. This tackles the issue of unreliable internet connections and ticket or wristband duplicates.

WEIGHT: 181G

PRICES

APP/AED 44 per day, per user

LTE+DEVICE/AED 29 per day, per user (optional)

STAFF/AED 55 per hour, minimum 3 hours (optional)
